DRAGON KINGDOM / FOR GROWN-UPS

A small update for your Wall Dragon

26 October 2026 - please keep this sheet with your setup card.

If your dragon shows an **HTTPS error** when checking for updates, there is a repair. Touch play and local phone controls still work. **Do not factory-reset it.**

Easy Update - recommended

1. Keep each dragon on its normal bottom USB-C supply. Scan UPDATE and download Easy Update for Windows or Mac.

2. Open the app while the computer has internet. It downloads latest stable firmware automatically. Wait until ready; offline mode is selected.

3. For lamps **not on home Wi-Fi**, choose **Find & update all dragons**. Allow OS Wi-Fi/location permission if asked. It joins each dragon, updates older firmware and skips current/newer lamps. Only use this where all nearby dragons are yours.

Already on home Wi-Fi? Choose **Home Wi-Fi** instead, then **Check for updates** and **Find dragons**, with computer and lamp on the same home network.

4. Wait for the results report. Parent password **dragon123** is filled in and editable. Each update backs up and checks the lamp, then tries to restore Wi-Fi. **Stop** finishes safely.

Wi-Fi updates need no laptop USB or opening the box. Easy Update also offers USB Auto for grown-up servicing; follow the manual first.

dragon-kingdom/setup/

OPEN YOUR DRAGON

http://192.168.4.1/
Join dragon Wi-Fi first

Need to set up Wi-Fi again?

Power the dragon on. On your phone, join **Dragon-Kingdom-XXXXXX** (your dragon has its own six letters/numbers). Wi-Fi password: **dragon123**. Stay connected if warned there is no internet. Open **http://192.168.4.1/**.

Unlock Parent settings with **dragon123**, then teach it your **2.4 GHz home Wi-Fi**. Rejoin home Wi-Fi and open the saved dragon address. The SETUP link repeats the full instructions and user manual.

Cannot find the lamp? Avoid guest/isolated networks; use Add address from its webpage. If you need help, contact the person who supplied your dragon.
